AMERICAN NICKEL WORKS,

Camden, N. J. Jan 6 18 87

Hon Dr Boyd, Supt. U. S. Mint

Dear Sir

I have read with attention and with concern your letter of yesterday in relation to a re-appearance of brittleness in the nickel-copper coin blanks

You of course understand that the trouble of careful manufacture and of inspection is much increased by such urgent and unexpectedly large demand as has made upon me within the last two months You will also appreciate that, if the Mint should give an order for delivery during a fixed term at a rate somewhat in excess of probable wants, the manufacturer could arrange his apparatus and his people for a continuous and steady campaign and thus reach the greatest excellence and uniformity

But I shall spare no pains to prevent any such faulty blanks from reaching you in the future

Yours truly

Joseph Wharton
